

## Environmental Management System (EMS) Auditor Course for Quality & Environmental Professionals

---

### Course Description

This highly interactive course follows the basic steps of an EMS audit, from Preparation and Evaluation, to Reporting and Corrective Action. Participants learn environmental auditing processes and procedures using the ISO 14001 standard as a basis.

### Course Purpose

To gain the knowledge and skills necessary to plan, conduct, report, and lead audits of environmental management systems (EMS); to meet the training requirements for EARA and RAB auditor certification.

### Course Benefits - Participants in this course will learn how to:

- Enhance and improve auditing skills
- Interpret the requirements of the ISO 14001 standard
- Identify the environmental issues of an organization to be audited
- Plan and prepare for an EMS audit
- Conduct an EMS audit, using effective auditing techniques and skills
- Audit the management of a regulatory compliance system, as part of an EMS
- Integrate EMS audits with other management system audits
- Report on an EMS audit to management
- Verify the effectiveness of corrective action of audit findings
